TECHNICAL SKILLS

Programming Languages: TypeScript, JavaScript, Java, Python, SQL (PostgreSQL), HTML/CSS
Frameworks: React, Next.js, Node.js, Jest, REST APIs
Cloud & DevOps: Docker, GitHub Actions (CI/CD), Azure (familiar), Linux (Ubuntu), SSH, Nginx
Tools & Practices: Git, GitHub, Agile/Scrum, MVC Architecture, Cloud-Native Development, Peer Code Reviews

EXPERIENCE

Backend Developer Intern | *TypeScript, Node.js, Agile, Git, Agile/Scrum* Feb 2026 – May 2026
Department of Science and Technology Region V Legazpi City, Albay

- Supported the development and maintenance of multiple REST API microservices, including a strategic planning CRUD service, in a 3-person Agile team using TypeScript and Node.js.
- Participated in software testing, defect resolution, and refactoring of microservice architecture from Clean Architecture to MVC patterns, improving code quality and maintainability.
- Built back-end integrations with PostgreSQL databases, developed REST APIs, containerized components with Docker, and wrote automated unit tests with Jest; followed coding standards and prepared technical documentation.
- Participated in Agile ceremonies including daily stand-ups and sprint planning; engaged in peer code reviews and collaborated with cross-functional team members to ensure on-time delivery.

Treasurer Nov 2022 – Jun 2023
CSC STI College Legazpi Legazpi City, Albay

- Processed and tracked all council expenditures, maintaining 100% accuracy in financial records.
- Collected and reconciled event fees from 157 students.
- Collaborated with IT department heads to approve and monitor event budgets.

PROJECTS & LEADERSHIP

ejobtrack | [GitHub](#) | *React, TypeScript, Gmail API, Transformers.js, Dexie.js* Jul 2026 – Present

- Built a zero-server job tracking SPA that auto-syncs Gmail via OAuth 2.0 and parses application status from LinkedIn, Indeed, and 50+ ATS using regex parsers with an on-device Transformers.js ML fallback for unknown senders.
- Designed a client-only architecture (IndexedDB, Cloudflare Pages) where tokens, email data, and ML inference never leave the browser, verifiable via DevTools.
- Implemented fuzzy duplicate detection across multi-platform applications and built an extensible parser registry for community-contributed platform support.

Agri-Connect | *React, Node.js, TypeScript, PostgreSQL, Docker, Git, Nginx* Feb 2025 – Nov 2025

- Developed a full-stack warehouse management system for a government agency, featuring automated report generation and a custom Facebook chatbot to handle routine inquiries, provide current pricing, and route users to appropriate contacts.
- Automated the build and deployment process via GitHub Actions, transferring files to the server via SSH and configuring Nginx to serve the updated web application.

Tagisan ng Talino: Codefest – Team Leader | *Java, Android Studio* March 2024 – April 2024

- Captained a 3-person team to 1st place in the local campus Codefest by developing a fully functional movie reservation application using Java and Android Studio.
- Secured 2nd place in the STI cluster-level finals, outperforming development teams from 8 different schools.

EDUCATION

STI College Legazpi – Graduated Cum Laude (1.4 GWA) Legazpi City, Albay
Bachelor of Science in Information Technology Sep 2022 – Jun 2026

INTERESTS

AI tools, Local LLM Models, Linux, Manga, Anime, Souls-like games
